Metal Kits & Cabinets

Every company's first aid program should begin with an adequately stocked first aid cabinet. Our industrial first aid cabinets provide you with the proper mix of items to keep your employees safe, productive and on-the-job.

Four-Shelf Cabinet

22¹/₄"H x 15¹/₄"W x 6"D

The industry standard, this cabinet contains an assortment of adhesive bandages, dressings, eye care products, antiseptics, employee comfort items and much more. Convenient door pouches allow for storage of smaller items. Perfect for medium to large industrial work settings.

Burn Kits

Be prepared for burn injuries—large and small. Water-Jel burn care products utilize a thick water-based and water-soluble gel made of 96% water, which is proven to dissipate heat and cool burns, quickly relieve pain, help stop burns from progressing deeper into the skin and help prevent infection.

Small Soft-Sided Burn Kit

Easy to carry burn kit that offers different combinations of Burn Dressings for large or minor burns. Perfect size for fitting under the seat of utility vehicles.

86401 13" x 1.75" x 7.91"

Small Soft-Sided Burn Kit Fill

- 1 12" x 16" Burn Dressing
- 2 4" x 16" Burn Dressings
- 2 4" x 4" Burn Dressings
- 2 3" Rolls of Gauze
- 1 Scissors
- 1 Instruction Card

* Kit fills subject to change

Large Soft-Sided Burn Kit

Be prepared for any burn emergency with the most versatile burn kit that offers different combinations of Burn Dressings and Fire Blankets for large or minor burns. Perfect for use in work vehicles or hanging on a wall.

Orange Pumice Soap

Crème formula with orange citrus ingredients and natural pumice scrubbers. For removing grease, tar and oil. Use with or without water. Portable, convenient and easy to use.

- 9534 1 Gallon Container

Emergency AED and Oxygen

Sudden Cardiac Arrest (SCA) is NOT a heart attack. SCA is a condition that causes the heart to unexpectedly & abruptly quit beating. This is usually caused by an abnormal heart rhythm called ventricular fibrillation (VF).

The only effective treatment for VF is an electrical shock called defibrillation. Defibrillation is an electrical current applied to the chest. The electrical current passes through the heart with the goal of stopping the VF and providing an opportunity for the heart's normal electrical system to take control. This current helps the heart reorganize the electrical activity so it can pump blood again. An automated external defibrillator (AED) can defibrillate the heart.

Zoll AED Plus®

The AED Plus' unique graphical interface – pictures combined with text displays and voice prompts – helps rescuers every step of the way. Lights on the pictures draw the rescuer's attention to actions in the proper sequence. Text and voice prompts correspond to the pictures and help the rescuer perform every important life-saving action. These pictures and prompts assure that everything is done in order, and that shocks, if required, are delivered rapidly.

- 3252 Zoll Lithium Batteries
- 3255 Standard Metal Wall Cabinet w. Alarm
- 3257 AED Plus® Black Carry Bag

Instant Medical Grade “Oxygen From Powder”. The OxySure Portable Emergency Oxygen System, Model 615 allows a parent, bystander or the victim him/herself to administer lifesaving oxygen in event of a medical emergency, while waiting for first responders to arrive.

OxySure Model 615

The OxySure Model 615 has been cleared by the U.S. Food & Drug Administration (FDA) for over-the-counter sale, without the need for a prescription. Unlike traditional oxygen tanks, no oxygen is stored under high pressure, so you can safely have oxygen available anywhere a medical emergency might occur. Now a family member or any bystander can administer potentially lifesaving oxygen during the first critical minutes between the onset of the medical emergency and the arrival of the fire/rescue/EMS personnel.
